

International-USA Not For Resale (NFR) Distributor and Customer Program

Beginning November 1, 2016 Limitless Worldwide distributors have the opportunity to expand their networks internationally.

This program allows International-USA distributors and customers living in markets outside of the United States to:

- Enroll as International-USA distributors or customers in their own country using a special International-USA NFR distributor and customer paper application form (this form will be available October 17).
- Purchase US products and have them sent to a US address only.
 - These orders could be sent to the US address of a family member, friend or commercial freight forwarder for eventual forwarding to their local market address.

USA-International Distributors are also able to:

- Enroll other distributors.
- Receive commissions in US dollars, paid to their International Propay accounts.

Step 1

In order for a country to be set up with this International-USA distributor option, Limitless Worldwide must first receive at least 10 International-USA distributor and/or customer applications and at least \$5,000 in orders via the paper application form.

Step 2

Once the company has received the qualifying amount of applications and orders, the individual market will be set up for NFR business and the prior submitted applications and orders will be processed.

Step 3

Once the market has been set up for International-USA NFR business, new International-USA distributors and customers from that market will be able to enroll online. During the application process the new USA-International Distributor or customer will use their local, international address as their mailing address and a US address as their shipping address, since the US products are always shipped to a US address.

Step 4

Limitless Worldwide has established a relationship with a freight forwarding company that provides a US address and service that International-USA distributors or customers may use for forwarding orders to their local market addresses. Details about how to enroll for this service will be announced soon.

Note:

- Limitless Worldwide products are not registered in these markets. USA-International distributors and customers are purchasing US products on a Not For Resale basis and for personal use only.
- The USA-International NFR Distributors and customers assume full responsibility of their products clearing customs and any associated fees.
- USA-International NFR Distributors' Starter Kits will not include the bag, but will include the option to purchase a bag at a reduced price.
