Tri-Active

Prostate Plus™

Prostate problems can be frustrating, inconvenient... even embarrassing. Many men who suffer from poor prostate health experience urinary hesitancy, straining, weak flow, prolonged voiding, partial or complete urine retention, painful urinating, overflow incontinence, urgency, or frequent nighttime urinating. In short, you're spending way too much time looking for a bathroom, and not enough time enjoying your life.

That's why Limitless Worldwide™ developed its Tri-Active Prostate Plus. It goes beyond traditional (and ineffective) Saw Palmetto (*Serenoa repens*) formulations to utilize a novel, cutting-edge, optimized compound that supports several parameters associated with urinary health and makes life easier — and much more comfortable — for adult men concerned with maintaining healthy prostate function.*

So if you're ready to get out of the bathroom and actually enjoy life, you need Limitless Worldwide's Tri-Active Prostate Plus.

HEALTHY PROSTATE FUNCTION ASSOCIATED WITH:

- Better Emptying of the Bladder
- Improved Urinary Flow
- Normalized Nighttime Urination

THE KEY FUNCTIONAL COMPOUND in our Tri-Active Prostate Plus™ was studied in a six-month, randomized, controlled trial. Results showed that the key ingredient provides statistically significant and clinically meaningful improvements in men's urinary tract health, including:

- | Urgency*
- | Intermittency*
- | Weak stream*
- | Straining*
- | Urine frequency*
- | Nighttime urination*

Science... Beyond Testimonials®

Prostate Health

Prostate issues are an age-related phenomenon that occurs in many men as early as age 40 and progresses with increasing age. The prevalence of these concerns are shown to be 10% for men in their 30s, 20% for men in their 40s, 50-60% for men in their 60s and 80-90% for men in their 70s and 80s. Indeed, most men who live past their 40s eventually develop prostate health concerns.

The major manifestations of prostate health concerns are associated with lower urinary tract symptoms, which are broadly divided into either obstructive or irritative symptoms. The obstructive symptoms include hesitancy in urination, straining, weak flow, prolonged voiding, partial or complete urine retention, and overflow incontinence. The irritative symptoms include frequency of urination, urgency, nocturia (waking up in the night to urinate), and painful urination.

Prostate Plus Supports Healthy Prostate Function*

Tri-Active Prostate Plus has been formulated on the cutting edge after thorough research to identify a truly effective natural compound in promoting men's urinary health. Indeed, the "historical" supplement for prostate health, Saw Palmetto (*Serenoa repens*), has recently been classified in a 2012 updated Cochrane review to "not improve lower urinary tract symptoms."

Thus, the Limitless Saw Palmetto-free Tri-Active Prostate Plus was developed with a novel, optimized compound, distinct in its ability to help maintain urinary health and comfort.*

The Prostate Plus key compound was studied in a six-month, randomized, double-blind, placebo-controlled study involving 124 men. Over the course of the trial, the subjects were evaluated using the International Prostate Symptom Score (IPSS).

Results showed statistically significant and clinically meaningful improvements in lower urinary tract complaints following supplementation with the key ingredient formulated in Prostate Plus including:

- Frequency (needing to urinate less than 2 hours after you last finished urinating)
- Intermittency (stopping and starting several times during urination)
- Urgency (difficulty postponing urination)
- Weak Stream (having a weak urinary stream)
- Straining (having to push or strain to urinate)
- Nocturia (getting up to urinate in the night)

Conclusion

Tri-Active Prostate Plus' novel cranberry-derived compound has been clinically demonstrated to be effective in supporting prostate health by addressing common urinary health concerns. It can help promote overall urinary function and provide meaningful improvements in men's urinary health. If you are looking for an effective solution for maintaining healthy urinary function, Prostate Plus is the answer.

Tri-Active Prostate Plus™

DIRECTIONS: Take two capsules daily

WARNING: Do not exceed suggested daily serving. For adult males only. Not for use by individuals under the age of 18 years. Consult your physician before use if you are taking medication or have a medical condition. Do not use if inner safety seal under the cap is broken or missing. **Keep out of reach of children. Use only as directed.**

If you or your health-care provider have any questions, please call: 1-800-429-4290.
