# Our Modern World Poses Huge Health Threats

Growing dangers threaten our wellness every day

It's no secret that today's modern world is a dangerous one – particularly to our health. Every day we're exposed to a growing number of toxins, pollutants and impurities. The typical American diet is teeming with sugar, unhealthy fats and harmful chemicals. A vast variety of contaminants can pollute the water we drink and the air we breathe. Our schedules are hectic, and high stress levels are the norm. We don't get enough sleep or enough exercise.

It's easy to see how all of this adds up to a variety of serious problems that plague our collective and individual states of health.
