

Thrive™ FAQs

WHAT IS HGH?

Human growth hormone (hGH) is a proteohormone (and therefore not a steroid as it is sometimes confused) produced and secreted by the pituitary gland. It is the most abundant pituitary hormone, accounting for 10% of pituitary dry weight. Secretion of hGH is pulsatile and follows a cyclic daily pattern of secretion (Circadian). It also influences other endocrine axes of other hormones including cortisol, thyroid and testosterone.

WHAT DOES IT DO?

Studies have shown that Thrive-hGH's Protovale™ compound caused a mean, bioactive, serum (blood) growth hormone increase of 682%.*

WHY WOULD WE WANT HIGHER HGH LEVELS?

Age advances with every tick of the clock. The real question is whether you will look younger, feel younger, and act younger. Reduced hGH levels are associated with the aging process. Media such as the *Dr. Oz Show*, *The Today Show*, *Vogue*, *Vanity Fair*, *Women's World*, *Fox News*, etc. have said time and time again that increasing growth hormone levels has been associated with the following benefits:

- Loss of body fat
- Increase in muscle tone
- Increased sex drive
- Improvements in hair, skin and nails
- "Look and feel decades younger"

HOW MUCH DOES THRIVE-HGH COST?

\$99.00 for a full 30-day supply.

HOW DO I TAKE THRIVE-HGH?

Adults take 4 capsules by mouth on an empty stomach either in the morning two hours before breakfast or two hours after dinner prior to bedtime. Do not eat two hours before or after taking this product. For best results, Thrive-hGH should be taken with a full glass of water. Do not exceed 4 capsules in any 24-hour period.

DOES THRIVE-HGH CONTAIN STIMULANTS?

Thrive-hGH does not contain stimulants.

CAN IT STOP THE TICKING OF THE CLOCK?

No. But it can make every tick of the clock much more pleasurable. Thrive-hGH is designed to help counter the age-related decrease in naturally occurring hGH.*

DOES THIS PRODUCT CONTAIN HGH?

No, Thrive-hGH contains a proprietary blend of amino acids formulated to help naturally increase your own hGH levels,* without expensive synthetic injections.

WHY IS THIS BETTER THAN REAL HGH?

Thrive-hGH contains an optimized blend of dietary ingredients that has been shown to increase REAL serum growth hormone in healthy adults after a single serving when taken on an empty stomach.* This is different from synthetic hGH injections because the hormone is naturally produced by the body, rather than being injected artificially into muscle tissue. So there's a difference in the way the growth hormone itself is distributed throughout the body.

DOES A PERSON NEED TO BE A 'PAYING MEMBER' TO PURCHASE THIS OR ANY OF THE PRODUCTS OFFERED? OR CAN A PERSON PURCHASE PRODUCTS FROM A DISTRIBUTOR?

The products will need to be purchased from a distributor.

WHERE CAN I GO TO FIND OUT MORE AND SEE COMPARATIVE STUDIES AND/OR TEST RESULTS?

There are several databases available online for academic literature including Pubmed and EBSCO Publishing. We also encourage you to visit your public library for additional academic resources on literature topics.

IF I'M ALREADY TAKING HGH, CAN I ADD THRIVE-HGH TO THE MIX?

If you're under a doctor's supervision for growth hormone therapy, you should consult with your physician before taking anything else.

WHAT HAPPENS IF I STOP TAKING THRIVE-HGH?

Upon discontinuing use of Thrive-hGH, users will no longer receive its hGH-enhancing benefits.

IS THERE AN AGE A PERSON IS TOO OLD TO START TAKING THRIVE-HGH?

There could be; we just don't know of any. As always, please follow all product instructions as listed on the label and consult your physician before using any product.

CAN I TAKE A MULTIVITAMIN WITH MY THRIVE-HGH?

You can take a multivitamin on the same days as Thrive-hGH, but since Thrive-hGH is designed to be taken on an empty stomach and multivitamins are best absorbed with food, we recommend taking them separately.

DO MEN AND WOMEN BOTH BENEFIT FROM NATURALLY INCREASING SERUM HGH LEVELS?

Thrive-hGH is designed to be taken by both men and women.

CAN I TAKE THIS WITH MY MEDICATION OR MEDICAL CONDITION?

Unfortunately, we are not in a position to offer a customer any medical advice and, therefore, direct you to your physician. As always, please follow directions and consult your physician before using any product.

DOES ANYONE ELSE HAVE THIS FORMULA?

Thrive-hGH is a 100% Protovale™ formula — the compound clinically proven to increase mean, serum (blood) growth hormone levels by 682%* — and is the ONLY 100% Protovale™ formula that's been licensed for sale in the direct-to-consumer market. We are aggressively pursuing legal action against any unlicensed companies or individuals who claim to be selling a Protovale™ formula or who are offering a so-called "hGH-boosting" product that lacks clinical substantiation.

WHAT IS THE CAPSULE GELATIN MADE OF?

Thrive gelatin capsules may use blends of several pharmaceutical-grade gelatins from traditional animal sources. They are non-vegetarian, nonpetroleum based.
